Subject: RE: latest ST-12 data

We have the laboratory reviewing the data, calculations, and methodology. I will let you know the results when I find out.

Subject: latest ST-12 data

Hi Don –

I've been looking through the latest batch of analytical data that was posted to the sharepoint site. One thing jumped out at me – for W34, the March data shows a benzene concentration of 470 ug/l. The rest of the concentrations in this well are low, making that benzene concentration look erroneous. Can you confirm that this concentration is correct? Previous benzene concentrations in this well were ~ 1 ug/l or ND.

Thanks Eva
